

LegalEase: AI-Powered Legal Document Generator

Phase 01: Brainstorming & Ideation Phase

Project Phase Document

Prepared for: LegalEase AI Project

Team: Srija M (Team Lead), Srivarshini M S, Subashree G, Subiksha M

1. Phase Objective

To identify the problem of preparing common legal documents and develop an AI-based idea that can make document creation simpler, faster and more accessible.

Problem Identification

Manual legal-document preparation can be time-consuming and may be difficult for users who are unfamiliar with legal wording and document structure.

Idea Generation

The team proposed LegalEase as an AI-powered legal document generator that accepts user requirements and produces structured legal-document content.

Target Users

The concept is intended for users who need help preparing general legal-document drafts and want a simple interface.

Core Idea

Use Generative AI to transform user-provided details into a structured legal-document draft, followed by document export.

Initial Features

User input form, AI-generated draft, readable output, document export and a simple web interface.

Key Activities / Outputs

No.	Deliverable / Output
1	Problem statement
2	Proposed solution
3	Initial feature list
4	Project title and scope
5	Team discussion/idea notes

Project Note

LegalEase is an AI-powered document-generation project. The generated material is intended as a draft and should be reviewed by an appropriately qualified person before being relied upon for legal purposes.
