

LegalEase: AI-Powered Legal Document Generator

Phase 06: Project Testing Phase

Project Phase Document

Prepared for: LegalEase AI Project

Team: Srija M (Team Lead), Srivarshini M S, Subashree G, Subiksha M

1. Phase Objective

To verify that LegalEase functions correctly, handles errors appropriately and produces usable generated documents.

Environment Test

Verify that the virtual environment and required Python packages are installed correctly.

Backend Test

Start the FastAPI application with Uvicorn and verify that the API is reachable.

Frontend Test

Launch the Gradio application and verify that the interface loads and accepts user input.

AI Test

Verify that the Gemini API key is loaded from the environment and that generation requests return output.

Export Test

Verify that generated content can be converted into the required document output.

Error Handling Test

Check missing API-key messages, import/configuration errors, port conflicts and unsupported document characters/fonts.

User Flow Test

Run the complete flow from entering requirements to generating and exporting a legal-document draft.

Key Activities / Outputs

No.	Deliverable / Output
1	Test cases
2	Expected vs actual results
3	Error logs and fixes

No.	Deliverable / Output
4	Integration test
5	Final user-flow verification

Project Note

LegalEase is an AI-powered document-generation project. The generated material is intended as a draft and should be reviewed by an appropriately qualified person before being relied upon for legal purposes.
