

LegalEase: AI-Powered Legal Document Generator

Phase 08: Project Demonstration Phase

Project Phase Document

Prepared for: LegalEase AI Project

Team: Srija M (Team Lead), Srivarshini M S, Subashree G, Subiksha M

1. Phase Objective

To present the completed LegalEase application and demonstrate its main workflow and project outcomes.

Introduction

Introduce LegalEase and explain the problem it addresses.

Architecture Explanation

Show the frontend, backend, AI-generation and document-export components.

Live Demonstration

Open the Gradio interface, enter sample document requirements and generate the document.

AI Demonstration

Explain how the Gemini-based generation component converts the supplied requirements into structured content.

Export Demonstration

Show the generated result and demonstrate the document-export capability.

Team Presentation

Present the project work, responsibilities, testing experience, key implementation decisions and future scope.

Closing

Summarize the project benefits and emphasize that generated legal documents require appropriate human/legal review.

Key Activities / Outputs

No.	Deliverable / Output
1	Presentation slides
2	Live application demo
3	Architecture explanation

No.	Deliverable / Output
4	Sample generated document
5	Testing/results summary
6	Future-scope discussion

Project Note

LegalEase is an AI-powered document-generation project. The generated material is intended as a draft and should be reviewed by an appropriately qualified person before being relied upon for legal purposes.
